Users

Manager  Steve Reid

User Mike Fox

User Sandra Gibson

You may assign a manager role to the authorized ones who can do all the settings and grant passcodes for others, while a user can only lock/unlock via the APP.

## V. Add a Lock as Invited Manager/User

5:47

< Add a lock as invited manager/user

The screenshot shows a mobile app interface for adding a user. At the top, the time is 5:47 and the title is 'Add a lock as invited manager/user'. Below the title, there is a 'Complete' button. The main content area displays the user's name 'Kally Hoffman' and role 'Manager', followed by a large QR code. Below the QR code are two icons: a share icon and a print icon.

9:41

< Add User

User Name: Kally Hoffman  
User Role: Manager

Complete

In the "Add User" function, you can set up different user roles for different management rights. After adding a user successfully, a QR Code will be generated.

5:47

< Add a lock as invited manager/user

The diagram illustrates the process of sharing a QR code. A hand holds a smartphone displaying a QR code. An arrow points from this phone to a share icon. Another arrow points from the share icon to a second smartphone held by another hand, which is displaying the same QR code. The background is a light blue gradient.

5:47

< Add a lock as invited manager/user

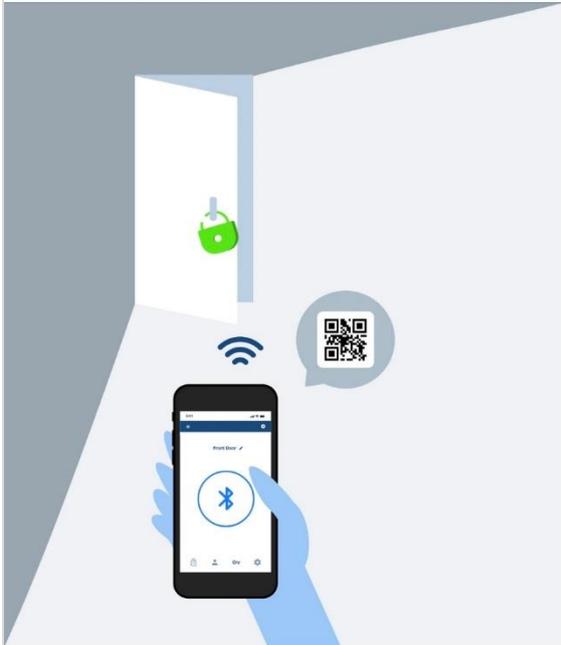

You can share the QR code to other users. When the shared user receives the QR code, he or she can go to the "Add Lock" function and scan the QR code to use the shared lock.
